<i>5/1/1992 - 12/31/2001</i>	A minimum score of 40 on each of the five tests in the battery AND an average score of 45. The average score is calculated by rounding down.

## Footnote

*1/1/2014 - Current*

TotalTranscript™ (TT) promotes parity between HSE and traditional K-12 pathways to high school completion by addressing the differential impact of mobility on HSE testers. In traditional K-12 pathways, schools universally honor mobile students' academic record, even when moving internationally. TT extends this principle to HSE and related alternative pathways. Specifically, TT honors mobile testers' academic record when moving between HSE test publishers. TT does so by generating a single transcript that integrates all current-series HSE test scores that adhere to JID test endorsement policies.
